

# INDEX TO VOLUME XXXIX

## AUTHORS

	Page		Page
Abbot, R. C. (see Rudolph M. Sandstedt) .....	123	fat content of ten varieties .....	59
Anderson, M. L. (see Betty Sullivan) .....	155	—, and Berta J. Rios. The chemical and essential amino acid composition of twenty-five selections of grain sorghum .....	50
Anderson, R. A. A note on the wet-milling of high-amylose corn containing 75-percent-amylose starch .....	406	Bushuk, W., and I. Hlynka. The effect of iodate and N-ethylmaleimide on extensigraph properties of dough .....	189
—, D. E. Uhl, W. L. Deatherage, and E. L. Griffin, Jr. Composition of the component parts of two hybrid high-amylose corns .....	282	— (see P. Meredith) .....	411
Anderson, R. H., and D. F. Moran. Quick method for riboflavin in a high-potency cereal product .....	463	Christensen, C. M. Invasion of stored wheat by <i>Aspergillus ochraceus</i> .....	100
Baker, Doris. Fatty acid composition of oil from damaged corn and wheat .....	393	—, and S. A. Qasem. Detection of <i>Aspergillus restrictus</i> in stored grain .....	68
Bandurski, R. S. (see R. H. Hamilton) .....	107	Cole, E. W., W. S. Hale, and J. W. Pence. The effect of processing variations on the alcohol, carbonyl, and organic acid contents of pre-ferments for break baking .....	114
Bautista, Gloria M., and P. Linko. Glutamic acid decarboxylase activity as a measure of damage in artificially dried and stored corn .....	455	Cotton, R. H. (see J. G. Ponte, Jr.) .....	437
Blessin, C. W. Carotenoids of corn and sorghum. I. Analytical procedure .....	236	Curnutte, B. (see R. J. Robinson) .....	183
—, R. J. Dimler, and O. J. Webster. Carotenoids of corn and sorghum. II. Carotenoid loss in yellow-endosperm sorghum grain during weathering .....	389	Deatherage, W. L. (see R. A. Anderson) .....	282
Bloksma, A. H. Communication to the Editor: The rate of diffusion between gas cells in batters or doughs .....	485	Dimler, R. J. (see C. W. Blessin) .....	389
Borchers, R. A note on the digestibility of the starch of high-amylose corn by rats .....	145	— (see Dorothy Bradbury) .....	72
Bradbury, Dorothy, M. J. Wolf, and R. J. Dimler. The hilar layer of white corn .....	72	— (see R. W. Jones) .....	336
Brekke, O. L., L. A. Weinecke, and E. L. Griffin, Jr. Corn dry-milling: Influence of feed rate and tail-gate loading upon Beall degenerator performance .....	381	Donelson, J. R., and W. T. Yamazaki. Note on a rapid method for the estimation of damaged starch in soft wheat flours .....	460
Bressani, R., L. G. Elias, N. S. Scrimshaw, and M. A. Guzman. Nutritive value of Central American corns. VI. Varietal and environmental influence on the nitrogen, essential amino acid, and		Elias, L. G. (see R. Bressani) .....	59
		Fujita, E. (see K. Yasumatsu) .....	364
		Ceddes, W. F. (see B. T. Lynch) .....	256
		Glass, R. L. (see B. T. Lynch) .....	256
		Glucklich, J., and Leora Shelef. An investigation into the rheological properties of flour dough. Studies in shear and compression .....	242
		Goldstein, A. M. (see Betty Sullivan) .....	155
		Columbic, C. (see J. R. Hart) .....	94
		Griffin, E. L., Jr. (see R. A. Anderson) .....	282
		— (see O. L. Brekke) .....	381
		Guzman, M. A. (see R. Bressani) .....	59
		Hale, W. S. (see E. W. Cole) .....	114
		Hamilton, R. H., R. S. Bandurski,	

- and W. H. Reusch. Isolation and characterization of a cyclic hydroxamate from *Zea mays* . . . 107
- Hart, J. R., K. H. Norris, and C. Columbic. Determination of the moisture content of seeds by near-infrared spectrophotometry of their methanol extracts . . . 94
- Hinton, J. J. C. Note on the distribution of ash in an Australian wheat . . . 341
- Hirata, Y. (see S. A. Watson) . . . 35
- Hlynka, I. Influence of temperature, speed of mixing, and salt on some rheological properties of dough in the farinograph . . . 286  
 — (see W. Bushuk) . . . 189  
 — (see K. M. Narayanan) . . . 351  
 — (see C. C. Tsen) . . . 195  
 — (see C. C. Tsen) . . . 209
- Holme, J. Characterization studies on the soluble proteins and pentosans of cake flour . . . 132
- Johnson, J. A. (see Yu-Yen Linko) . . . 263  
 — (see Yu-Yen Linko) . . . 468  
 — (see Y. Pomeranz) . . . 398  
 — (see R. J. Robinson) . . . 183
- Jones, J. B. (see Priscilla A. Veitch) . . . 220
- Jones, R. W., and R. J. Dimler. Electrophoretic composition of gluteins from air-classified flours . . . 336

# SUBJECTS

	Page		Page
Absorption; determination of, in HRS wheats, centrifuge method (Sosulski) . . . . .	344	in stored grain (Christensen and Qasem) . . . . .	68
Acids, fatty, see Fatty acids		Bakery products; softening agents in (Veitch and Jones) . . . . .	220
Air-classified flour, see Flour, particle size of		Baking studies on gamma-irradiated flour (Lee) . . . . .	147
Aleurone layer; content of, in Australian wheat (Hinton) . . . . .	341	Baking technique; effect of, on carbonyl compounds in bread (Linko, Johnson, and Miller) . . . . .	468
Alpha-amylase; determination of, by amylograph (Pomeranz and Shellenberger) . . . . .	327	Baking tests, cake; for responses of quality to ingredient ratios (Kissell and Marshall) . . . . .	16
Amino acids		Batters, gas cells in; diffusion rate of (bubble mechanics) (Blokma) . . . . .	485
Of corn (Central American) (Bressani, Elias, Scrimshaw, and Guzman) . . . . .	59	Benzoxazine derivative, occurrence in Zea mays (Hamilton, Bandurski, and Reusch) . . . . .	107
In flour and wheat (Australian); variations in composition (Simmonds) . . . . .	445	Benzoxazolinone derivatives, preparation of (Hamilton, Bandurski, and Reusch) . . . . .	107
Of sorghum (Bressani and Rios) . . . . .	50	Beta-glucanases, malt; separation and characterization (Luchsinger) . . . . .	225
Amylase; pancreatic digestion on various raw starches (Sandstedt, Strahan, Ueda, and Abbot) . . . . .	123	Bleaching of wheat starch with chlorine (Uchino and Whistler) . . . . .	477
Amylase, alpha-; of wheat (sprouted), milled by Raikai process (Meredith) . . . . .	168	Bread	
Amylograms; effect of starting temperature on (Shuey) . . . . .	44	Carbonyl compounds in; changes during aging (Linko, Johnson, and Miller) . . . . .	468
Amylograph; for determining alpha-amylase (Pomeranz and Shellenberger) . . . . .	327	Firming of, vs. flour quality (Ponte, Titcomb, and Cotton) . . . . .	437
Antibiotics		Flavor of, see Flavor of bread	
Elaborated from yeast; structure of (Robinson, Miller, Johnson, Curnutte, and Lord) . . . . .	183	Loaf volume of; effect of maleimide-type -SH-blocking agents on (Lee and Reynolds) . . . . .	427
Isolated from pre-ferments (Robinson, Miller, Johnson, Curnutte, and Lord) . . . . .	183	Antibiotics from; structure of (Robinson, Miller, Johnson, Curnutte, and Lord) . . . . .	183
Antioxidants; improve effect of, in dough (Narayanan and Hlynka) . . . . .	351	Breadmaking, pre-ferments; see under Fermentation	
Apparatus for shear and compression studies (Glucklich and Shelef) . . . . .	242	Bubble mechanics, in batters and doughs (Blokma) . . . . .	485
Ash		Cake; quality of; multi-factor responses to basic ingredient ratios (Kissell and Marshall) . . . . .	16
Content of, in wheat; effect of insect infestation on (Liscombe) . . . . .	372	Cake flour; soluble constituents of (Holme) . . . . .	132
Distribution in kernel of Australian wheat (Hinton) . . . . .	341	Carbonyl compounds	
In infested wheat, vs. density (Peters and Katz) . . . . .	487	In bread; changes in during aging (Linko, Johnson, and Miller) . . . . .	468
Aspergillus ochraceus; invasion of stored wheat by (Christensen) . . . . .	100		
Aspergillus restrictus; detection of,			

- Quantitative determination of, in pre-ferments (Linko, Miller, and Johnson) . . . . . 263
- Carotenes and carotenoids**
- Determination in hybrid yellow corn and grain sorghum (by chromatography) (Blessin) . . . . . 236
- Loss in sorghum grain during weathering (Blessin, Dimler, and Webster) . . . . . 389
- Cell walls of endosperm; breakage in flour milling (Schulze and MacMasters)** . . . . . 204
- Cereals (ready-to-eat); riboflavin in, quick method for determining (Anderson and Moran)** . . . . . 463
- Chemical composition of sorghum (Bressani and Rios)** . . . . . 50
- Chlorine, for oxidation of wheat starch (Uchino and Whistler)** . . . . . 477
- Chlorine-methanol treatment of dialdehyde starches (Schaefer, Russell, and Rist)** . . . . . 1
- 2-Chloroethanol, as dispersant for gluten (Olcott)** . . . . . 262
- Chromatography of sugars, in wheat stored in presence and absence of molds (Lynch, Glass, and Geddes)** . . . . . 256
- Color of flours; characteristics (Yasunaga and Uemura)** . . . . . 171
- Composition of high-amylose corn (Anderson, Uhl, Deatherage, and Griffin)** . . . . . 282
- Compressibility of bread crumb vs. flour quality (Ponte, Titcomb, and Cotton)** . . . . . 437
- Compression in dough (Glucklich and Shelef)** . . . . . 242
- Cooking quality of rice, with the plastograph (Yasumatsu and Fujita)** . . . . . 364
- Corn (see also succeeding Corn entries)**
- (Central American) Environmental and varietal influence on nutritive value (Bressani, Elias, Scrimshaw, and Guzman) . . . . . 59
- Damage in; glutamic acid decarboxylase activity as index (Bautista and Linko) . . . . . 455
- Damaged; fatty acid composition of (Baker) . . . . . 393
- Dried artificially; wet-milling of (Watson and Hirata) . . . . . 35
- Effect of genetic composition on raw-starch digestibility (Sandstedt, Strahan, Ueda, and Abbot) . . . . . 123
- High-amylose composition of component parts (Anderson, Uhl, Deatherage, and Griffin) . . . . . 282
- digestibility of starch of (Borchers) . . . . . 145
- wet-milling of (Anderson) . . . . . 406
- Hybrid yellow, carotenoids in (Blessin) . . . . . 236
- Pigmentation in hilar layer of (Bradbury, Wolf, and Dimler) . . . . . 72
- Structure of hilar layer ("black speck") (Bradbury, Wolf, and Dimler) . . . . . 72
- Corn degerminator; performance study (Brekke, Weinecke, and Griffin)** . . . . . 381
- Corn grits; "black speck" problem in (Bradbury, Wolf, and Dimler)** . . . . . 72
- Corn starch**
- Comparative digestibility of high-amylose starches (Sandstedt, Strahan, Ueda, and Abbot) . . . . . 123
- From high-amylose corn, note on wet-milling (Anderson) . . . . . 406
- (Waxy) Isolation of maltulose from alpha-amylase hydrolysates of (Radomski and Smith) . . . . . 30
- Corn wet-milling of high-amylose corn (Anderson)** . . . . . 406
- Cyclic hydroxamate, occurrence in Zea mays (Hamilton, Bandurski, and Reusch)** . . . . . 107
- Damaged corn, see Corn, Damaged**
- Damaged starch, see Starch, Damaged**
- Density gradient column; for measuring wheat density and detecting insect infestation (Peters and Katz)** . . . . . 487
- Dialdehyde starches, reacted with chlorine in methanol (Schaefer, Russell, and Rist)** . . . . . 1
- 2,4-Dihydroxy-7-methoxybenzoxazin-3(4H)-one, properties of, and occurrence in Zea mays (Hamilton, Brandurski, and Reusch)** . . . . . 107
- Dimethyl sulfoxide, solvent for granular starch (Leach and Schoch)** . . . . . 318
- Dough(s)**
- Effect of iodate and NEMI on extensigraph properties (Bushuk and Hlynka) . . . . . 189
- Effect of iodate, NEMI, and oxygen on mixing tolerance of (Meredith and Bushuk) . . . . . 411
- Gas cells in; diffusion rate of (bubble mechanics) (Bloksma) . . . . . 485
- Influence of temperature, speed

- of mixing, and salt on rheological properties in farinograph (Hlynka) ..... 286
- Mixing of; changes in protein during (Mecham, Sokol, and Pence) ..... 81
- Oxidation of; role of lipids in (Tsen and Hlynka) ..... 209
- Rheological properties of (Glucklich and Shelef) ..... 242
- Role of lipids in (Narayanan and Hlynka) ..... 351
- Drying (artificial) of corn; glutamic acid decarboxylase activity as index of damage (Bautista and Linko)** ..... 455
- Electron paramagnetic resonance studies on gamma-irradiated flour (Lee)** ..... 147
- Electrophoresis of flour fractions (Holme)** ..... 132
- Endosperm cell walls; breakage of, in flour milling (Schulze and MacMasters)** ..... 204
- Enzymes, see specific enzymes**
- Enzyme activity; effect of starting temperature on amylograms (Shuey)** ..... 44
- Erratum** ..... 350
- Experimental design for cake quality; responses to ingredient ratios (Kissell and Marshall)** ..... 16
- Experimental milling, see Milling, experimental**
- Extensigrams; effect on, of iodate and NEMI (Bushuk and Hlynka)** ..... 189
- Extensimeter for shear and compression studies (Glucklich and Shelef)** ..... 242
- Extraction**
- Of flour proteins (Mecham, Sokol, and Pence) ..... 81
- Of lipids from wheat products (Tsen, Levi, and Hlynka) ..... 195
- Extraction studies; soluble proteins of cake flour (Holme)** ..... 132
- Farinograph studies**
- Cooking quality of rice (Yasumatsu and Fujita) ..... 364
- Influence of temperature, speed of mixing, and salt on rheological properties of dough (Hlynka) ..... 286
- Fat, in corn (Central American); varietal and environmental study (Bressani, Elias, Scrimshaw, and Guzman)** ..... 59
- Fatty acids**
- In damaged corn and wheat (Baker) ..... 393
- Free, improver and protective effect in dough (Narayanan and Hlynka) ..... 351
- Fermentation; Pre-ferments**
- Effect of processing on alcohol, carbonyl, and organic acid content of (Cole, Hale, and Pence) ..... 114
- Quantitative determination of certain carbonyl compounds in (Linko, Miller, and Johnson) ..... 263
- Structure of antibiotics from yeast (Robinson, Miller, Johnson, Cumutte, and Lord) ..... 183
- Flavor of bread; quantitative determination of certain carbonyl compounds in pre-ferments (Linko, Miller, and Johnson)** ..... 263
- Flour(s) (see also succeeding Flour entries)**
- Absorption, determined by centrifuge method (Sosulski) ..... 344
- (Australian) Amino acid composition; variations in (Simmonds) ..... 445
- Cake, see Cake entries
- Color characteristics of (Yasunaga and Uemura) ..... 171
- Damaged starch in; rapid method for estimation (Donelson and Yamazaki) ..... 460
- Effect of defatting on rheological properties of dough (Narayanan and Hlynka) ..... 351
- Effect of ratio variation on cake quality (Kissell and Marshall) ..... 16
- Effect of starting temperature on amylograms (Shuey) ..... 44
- Gamma-irradiated; electron paramagnetic resonance studies (Lee) ..... 147
- Particles of, from breakage of endosperm cell walls in milling (Schulze and MacMasters) ..... 204
- Particle size of; electrophoretic composition of gluteins (Jones and Dimler) ..... 336
- Quality of, factor in bread firming (Ponte, Titcomb, and Cotton) ..... 437
- Starch damage in, determination (Sullivan, Anderson, and Goldstein) ..... 155
- Sulfated, preparation and properties (Smith, Russell, and Rist) ..... 273
- Flour fractions**
- Cake; soluble proteins and pentosans of (Holme) ..... 132
- Glutens; electrophoretic composition (Jones and Dimler) ..... 336

- Flour improvers; bromate and iodate; oxidation of -SH groups of gluten by (Lee and Samuels)** ..... 482
- Flour yield; effect of insect infestation on (Liscombe)** ..... 372
- Gamma-irradiated flour; electron paramagnetic resonance studies on (Lee)** ..... 147
- Gas cells in dough, diffusion rate of (Bloksma)** ..... 485
- Gliadin; preparation of, improved method (McDonald)** ..... 311
- Glutamic acid decarboxylase activity, index of damage in artificially dried corn (Bautista and Linko)** ..... 455
- Gluten**  
   Use of 2-chloroethanol as dispersant for (Olcott) ..... 262  
   Electrophoretic composition of, from air-classified flours (Jones and Dimler) ..... 336  
   Gliadin preparation from (McDonald) ..... 311  
   -SH groups of; oxidation by bromate and iodate (Lee and Samuels) ..... 482
- Grain**  
   Damaged (corn and wheat); fatty acid composition of (Baker) ..... 393  
   Moisture content of, by near-infrared spectrophotometry of its methanol extract (Hart, Norris, and Columbic) ..... 94
- Grain sorghum**  
   Amino acids of, and chemical composition (Bressani and Rios) ..... 50  
   Carotenoids in; chromatographic procedure (Blessin) ..... 236  
   Carotenoid loss during weathering (Blessin, Dimler, and Webster) ..... 389
- Grain storage fungi, detection of (Christensen and Qasem)** ..... 68
- High-amylose corn, see Corn, High-amylose**
- Hydration of flour proteins (Mecham, Sokol, and Pence)** ..... 81
- Ingredients, cake, ratio variations vs. responses of quality (Kissell and Marshall)** ..... 16
- Insect infestation, of wheat**  
   Determined with density gradient column (Peters and Katz) ..... 487  
   Milling losses caused by (Liscombe) ..... 372
- Iodate**  
   Effect of  
     on mixing tolerance of flours (Meredith and Bushuk) ..... 411  
     on extensigraph properties (Bushuk and Hlynka) ..... 189
- Lactase; use in breadmaking (Pomeranz, Miller, Miller, and Johnson)** ..... 398
- Lactose; hydrolysis by lactase in panary fermentation (Pomeranz, Miller, Miller, and Johnson)** ..... 398
- Leavening; effect of ratio variation on cake quality (Kissell and Marshall)** ..... 16
- Lipids**  
   Effect of, on rheological properties of dough (Narayanan and Hlynka) ..... 351  
   Extraction of, from wheat products; rapid method (Tsen, Levi, and Hlynka) ..... 195  
   Role of, in oxidation of doughs (Tsen and Hlynka) ..... 209
- Maleimide (MI); effect on loaf volume, mixograms, and yeast gassing power (Lee and Reynolds)** ..... 427
- Malt beta-glucanases; separation and characterization (Luchsinger)** ..... 225
- Maltulose, isolated from alpha-amylase hydrolysates of waxy corn starch (Radomski and Smith)** ..... 30
- Methods**  
   For absorption in HRS wheats (centrifuge) (Sosulski) ..... 344  
   For estimation of damaged starch in soft-wheat flours (Donelson and Yamazaki) ..... 460  
   For extracting lipids from wheat products (Tsen, Levi, and Hlynka) ..... 195  
   Gliadin (wheat), preparation of, from gluten (McDonald) ..... 311  
   For riboflavin in high-potency cereal product (Anderson and Moran) ..... 463  
   Viscosity (intrinsic) of dialdehyde starch (Schaefer, Maurice, Russell, and Rist) ..... 304
- 6-Methoxybenzoxazolinone, formation of (Hamilton, Bandurski, and Reusch)** ..... 107
- MI, see Maleimide**
- Milling**  
   Breakage of endosperm cell walls during (Schulze and MacMasters) ..... 204

- Determination of starch damage of flour (Sullivan, Anderson, and Goldstein) . . . . . 155
- Losses from insect infestation (Liscombe) . . . . . 372
- Milling, experimental**
- Corn; degerminator performance study (Brekke, Wein-  
  ecke, and Griffin) . . . . . 381
- Wheat, sprouted; Raikai process applied (Meredith) . . . . . 168
- Mixing of dough; changes in protein during (Mecham, Sokol, and Pence) . . . . . 81
- Mixing tolerance; effect on, of iodate, NEMI, and oxygen (Meredith and Bushuk) . . . . . 411
- Mixograms; effect on, of maleimide-type -SH-blocking agents (Lee and Reynolds) . . . . . 427
- Moisture content of seeds, by near-infrared spectrophotometry (Hart, Norris, and Golumbic) . . . . . 94
- Molds (see also **Storage fungi**), in stored wheat; quantitative sugar changes in presence and absence of (Lynch, Glass, and Geddes) . . . . . 256
- N-Acetyl-6-methoxybenzoxazolinone**, preparation of (Hamilton Bandurski, and Reusch) . . . . . 107
- Near-infrared spectrophotometry**, applied to moisture determination in seeds (Hart, Norris, and Golumbic) . . . . . 94
- NEMI**, see **N-Ethylmaleimide**
- N-Ethylmaleimide (NEMI)**
- Effect on extensigraph properties (Bushuk and Hlynka) . . . . . 189
- Effects on loaf volume, mixograms, and yeast gassing power (Lee and Reynolds) . . . . . 427
- Effect on mixing tolerance of doughs (Meredith and Bushuk) . . . . . 411
- Nitrogen**, of Central American corn; varietal and environmental study (Bressani, Elias, Scrimshaw, and Guzman) . . . . . 59
- N-Methyl-6-methoxybenzoxazolinone**, preparation of (Hamilton, Bandurski, and Reusch) . . . . . 107
- N-Phenylmaleimide (NPMI)**; effects of, on loaf volume, mixograms, and yeast gassing power (Lee and Reynolds) . . . . . 427
- NPMI**, see **N-Phenylmaleimide**
- Nutritive value**
- Of Central American corn (Bressani, Elias, Scrimshaw, and Guzman) . . . . . 59
- Oxidation**
- Of -SH groups by bromate and iodate (Lee and Samuels) . . . . . 482
- Of wheat starch with chlorine (Uchino and Whistler) . . . . . 477
- Oxidizing agents**; effect of, on extensigraph properties (Bushuk and Hlynka) . . . . . 189
- Oxygen**; effect of, on mixing tolerance of doughs (Meredith and Bushuk) . . . . . 411
- Particle size**, see under **Flour**
- Pentosans** of cake flour; studies on (Holme) . . . . . 132
- Pigmentation**
- In egg yolk and poultry (Bles-sin) . . . . . 236
- In hilar layer of corn (Brad-bury, Wolf, and Dimler) . . . . . 72
- Polyoxyethylene glycol**; chromatographic detection of (Veitch and Jones) . . . . . 220
- Pre-ferment process**, see **Fermen-tation**
- Protein(s)**
- Of flour; effect on, of dough mixing (Mecham, Sokol, and Pence) . . . . . 81
- Gliadin preparation (McDonald) . . . . . 311
- In infested wheat, vs. density (Peters and Katz) . . . . . 487
- Soluble, of cake flour; studies on (Holme) . . . . . 123
- Radioactive tracers**, see **Radioactivity**
- Radioactivity**
- Gamma-irradiated flour for elec-tron paramagnetic resonance studies (Lee) . . . . . 147
- Sulfur-35 as tracer in wheat for study of -SH groups of glu-ten (Lee and Samuels) . . . . . 482
- Raikai milling process**, applied to sprouted wheat (Meredith) . . . . . 168
- Response surface analysis** for cake quality (Kissell and Marshall) . . . . . 16
- Rheology of dough** (see also **Fari-nograph studies**)
- Role of lipids (Narayanan and Hlynka) . . . . . 351
- Shear and compression (Gluck-lich and Shelef) . . . . . 242
- Riboflavin**; in ready-to-eat cereals; quick method for determining (Anderson and Moran) . . . . . 463
- Rice**; cooking quality of, by plastog-raph (Yasumatsu and Fujita) . . . . . 364
- Seeds**; moisture content of, by near-infrared spectrophotom-etry of their methanol ex-tracts (Hart, Norris, and Golumbic) . . . . . 94

- Shear and compression in dough** (Glucklich and Shelef) ..... 242
- Shortening; effect of ratio variation on cake quality** (Kissell and Marshall) ..... 16
- Softening agents in bakery products** (Veitch and Jones) ..... 220
- Sorghum, see Grain sorghum**
- Spectrophotometric method for determining moisture in seeds** (Hart, Norris, and Columbic) ..... 94
- Staling of bread; flour quality as factor in firming** (Ponte, Titcomb, and Cotton) ..... 437
- Starch(es)**
- Comparative digestibilities of (Sandstedt, Strahan, Ueda, and Abbot) ..... 123
- Damaged
- in flour, determination (Sullivan, Anderson, and Goldstein) ..... 155
- estimation of in soft wheat flours; rapid method (Donelson and Yamazaki) ..... 460
- Dialdehyde
- intrinsic viscosity (Schaefer, Maurice, Russell, and Rist) ..... 304
- reacted with chlorine in methanol (Schaefer, Russell, and Rist) ..... 1
- High-amylose; digestibility of (Borchers) ..... 145
- (Sandstedt, Strahan, Ueda, and Abbot) ..... 123
- Liquefaction of, as index of alpha-amylase (Pomeranz and Shellenberger) ..... 327
- (Wheat) Oxidation of, with chlorine (Uchino and Whistler) ..... 477
- Pregelatinized; use of in determination of alpha-amylase (Pomeranz and Shellenberger) ..... 327
- Solubilization in dimethyl sulfoxide (Leach and Schoch) ..... 318
- Structure of (Radomski and Smith) ..... 30
- Storage fungi**
- Aspergillus ochraceus; invasion of stored wheat by (Christensen) ..... 100
- Aspergillus restrictus, detection of in grain (Christensen and Qasem) ..... 68
- Storage studies**
- With bread; changes in carbonyl compounds in (Linko, Johnson, and Miller) ..... 468
- With wheat
- invasion by fungi (Christensen) ..... 100
- quantitative changes of sugars in (Lynch, Glass, and Geddes) ..... 256
- Stored grain; detection of fungi in** (Christensen and Qasem) ..... 68
- Structure**
- Of antibiotics elaborated from yeast (Robinson, Miller, Johnson, Curnutte, and Lord) ..... 183
- Of hilar layer in corn ("black speck") (Bradbury, Wolf, and Dimler) ..... 72
- Of starch granule (Leach and Schoch) ..... 318
- Sugar(s)**
- Effect of ratio variation on cake quality (Kissell and Marshall) ..... 16
- Of wheat; quantitative changes in during storage (Lynch, Glass, and Geddes) ..... 256
- Sulfation of flour; properties** (Smith, Russell, and Rist) ..... 273
- Sulphydryl groups of gluten; oxidation of, by bromate and iodate** (Lee and Samuels) ..... 482
- Sulphydryl reagents; effect on mixing tolerance of doughs** (Meredith and Bushuk) ..... 411
- Sulphydryl-blocking agents**
- Effect on extensigraph properties (Bushuk and Hlynka) ..... 189
- Maleimide-type; comparative studies on effects (Lee and Reynolds) ..... 427
- Viscosity (intrinsic)**
- Of dialdehyde starch (Schaefer, Maurice, Russell, and Rist) ..... 304
- Effect on, of amylograph starting temperature (Shuey) ..... 44
- Vitamin A, precursors of** (Blessin) ..... 236
- Volumetric compression apparatus for shear and compression studies** (Glucklich and Shelef) ..... 242
- Water; effect of ratio variation on cake quality** (Kissell and Marshall) ..... 16
- Wet-milling of artificially dried corn** (Watson and Hirata) ..... 35
- Wheat**
- (Australian) Aleurone layer content and distribution of ash in kernel (Hinton) ..... 341
- (Australian) Amino acid composition; variations in (Simmonds) ..... 445
- Breakage of endosperm cell walls in milling (Schulze and MacMasters) ..... 204
- Damaged, fatty acid composition of (Baker) ..... 393

- Density of, measured with density gradient column (Peters and Katz) ..... 487
- Flour absorption in (centrifuge method) (Sosulski) ..... 344
- Gluten, see **Gluten**
- Sprouted, Raikai milling process applied to (Meredith) ..... 168
- Stored, see **Storage studies**;  
**Stored grain**
- Sugars of; quantitative changes in during storage (Lynch, Glass, and Geddes) ..... 256
- Wheat products; lipids from, method for extraction (Tsen, Levi, and Hlynka) ..... 195
- Xanthophylls**
- Determination in hybrid yellow corn and grain sorghum, by chromatography (Blessin) ... 236
- Loss of, in sorghum grain during weathering (Blessin, Dimler, and Webster) ..... 389
- Yeast**; structure of antibiotics from (Robinson, Miller, Johnson, Curnutte, and Lord) ... 183
- Yeast gassing power**; effect of maleimide-type -SH-blocking agents on (Lee and Reynolds) 427

Jones Press Inc., Minneapolis, Minn.

# CONTENTS

NUMBER 1, JANUARY, 1962

	PAGE
Polymeric Products from the Reaction of Dialdehyde Starches with Chlorine in Methanol. Preparation and Properties. <i>W. C. Schaefer, C. R. Russell, and C. E. Rist</i> .....	1
Multi-Factor Responses of Cake Quality to Basic Ingredient Ratios. <i>Leo T. Kissell and Ben D. Marshall</i> .....	16
Isolation of Maltulose from Alpha-Amylase Hydrolysates of Waxy Corn Starch. <i>M. W. Radomski and M. Doreen Smith</i> .....	30
Some Wet-Milling Properties of Artificially Dried Corn. <i>S. A. Watson and Yoshiro Hirata</i> .....	35
The Effect of Starting Temperature on Amylograms. <i>William C. Shuey</i> .....	44
The Chemical and Essential Amino Acid Composition of Twenty-Five Selections of Grain Sorghum. <i>Ricardo Bressani and Berta J. Ríos</i> .....	50
Nutritive Value of Central American Corns. VI. Varietal and Environmental Influence on the Nitrogen, Essential Amino Acid, and Fat Content of Ten Varieties. <i>R. Bressani, L. G. Ellas, N. S. Scrimshaw, and M. A. Guzmán</i> .....	59
Detection of <i>Aspergillus restrictus</i> in Stored Grain. <i>C. M. Christensen and S. A. Qasem</i> .....	68
The Hilar Layer of White Corn. <i>Dorothy Bradbury, M. J. Wolf, and R. J. Dimler</i> .....	72
Editorial Policy and Suggestions to Authors .....	79

## NUMBER 2, MARCH, 1962

Extractable Protein and Hydration Characteristics of Flours and Doughs in Dilute Acid. <i>D. K. Mecham, H. A. Sokol, and J. W. Pence</i> .....	81
Determination of the Moisture Content of Seeds by Near-Infrared Spectrophotometry of Their Methanol Extracts. <i>Joe R. Hart, Karl H. Norris, and Calvin Golumbic</i> .....	94
Invasion of Stored Wheat by <i>Aspergillus ochraceus</i> . <i>Clyde M. Christensen</i> .....	100
Isolation and Characterization of a Cyclic Hydroxamate from <i>Zea mays</i> . <i>R. H. Hamilton, R. S. Bandurski, and W. H. Reusch</i> .....	107
The Effect of Processing Variations on the Alcohol, Carbonyl, and Organic Acid Contents of Pre-ferments for Bread Baking. <i>E. W. Cole, W. S. Hale, and J. W. Pence</i> .....	114

The Digestibility of High-Amylose Corn Starches Compared to That of Other Starches. The Apparent Effect of the <i>ae</i> Gene on Susceptibility to Amylase Action. <i>Rudolph M. Sandstedt, Donna Strahan, S. Ueda, and R. C. Abbot</i> .....	123
Characterization Studies on the Soluble Proteins and Pentosans of Cake Flour. <i>John Holme</i> .....	132
A Note on the Digestibility of the Starch of High-Amylose Corn by Rats. <i>Raymond Borchers</i> .....	145
Electron Paramagnetic Resonance and Baking Studies on Gamma-Irradiated Flour. <i>C. C. Lee</i> .....	147
The Determination of Starch Damage of Flour. <i>Betty Sullivan, Merlin L. Anderson, and Alvin M. Goldstein</i> .....	155
Communication to the Editor: Application of the Rakai Milling Process to Sprouted Wheat. <i>Peter Meredith</i> .....	168
Editorial Policy and Suggestions to Authors .....	170

## NUMBER 3, MAY, 1962

Evaluation of Color Characteristics of Flours Obtained from Various Types and Varieties of Wheat. <i>Takashi Yasunaga and Mitsuo Uemura</i> .....	171
Studies of Two Polypeptide Antibiotics Elaborated by <i>Saccharomyces cerevisiae</i> . <i>Robert J. Robinson, Byron S. Miller, John A. Johnson, Basil Curnutte, and Thomas H. Lord</i> .....	183
The Effect of Iodate and N-Ethylmaleimide on Extensigraph Properties of Dough. <i>W. Bushuk and I. Hlynka</i> .....	189
A Rapid Method for the Extraction of Lipids from Wheat Products. <i>C. C. Tsen, I. Levi, and I. Hlynka</i> .....	195
Breakage of Endosperm Cell Walls in Flour Milling. <i>W. E. Schulze and Majel M. MacMasters</i> .....	204
The Role of Lipids in Oxidation of Doughs. <i>C. C. Tsen and I. Hlynka</i> .....	209
The Detection of Polyoxyethylene Glycol in Bakery Products. <i>Priscilla A. Veitch and J. B. Jones</i> .....	220
The Mechanism of Action of Malt Beta-Glucanases. II. Separation and Characterization of Malt Endo-Beta-Glucanases. <i>Wayne W. Luchsinger</i> .....	225
Carotenoids of Corn and Sorghum. I. Analytical Procedure. <i>C. W. Blessin</i> .....	236
An Investigation into the Rheological Properties of Flour Dough. Studies in Shear and Compression. <i>Joseph Glucklich and Leora Shelef</i> .....	242
Grain Storage Studies. XXXII. Quantitative Changes Occurring in the Sugars of Wheat Deteriorating in the Presence and Absence of Molds. <i>B. T. Lynch, R. L. Glass, and W. F. Geddes</i> ..	256

- Communication to the Editor. The Use of 2-Chloroethanol as a Dispersant for Gluten. *H. S. Olcott* ..... 262

## NUMBER 4, JULY, 1962

- Quantitative Determination of Certain Carbonyl Compounds in Pre-ferments. *Yu-Yen Linko, Byron S. Miller, and John A. Johnson* ..... 263
- Preparation and Properties of Sulfated Wheat Flour. *H. E. Smith, C. R. Russell, and C. E. Rist* ..... 273
- Composition of the Component Parts of Two Hybrid High-Amylose Corns. *R. A. Anderson, D. E. Uhl, W. L. Deatherage, and E. L. Griffin, Jr.* ..... 282
- Influence of Temperature, Speed of Mixing, and Salt on Some Rheological Properties of Dough in the Farinograph. *I. Hlynka* ..... 286
- Intrinsic Viscosity of Dialdehyde Starch in Alkaline Urea after Reduction with Borohydride. *W. C. Schaefer, Judith J. Maurice, C. R. Russell, and C. E. Rist* ..... 304
- An Improved Method for the Preparation of Wheat Gliadin. *C. E. McDonald* ..... 311
- Structure of the Starch Granule. III. Solubilities of Granular Starches in Dimethyl Sulfoxide. *Harry W. Leach and Thomas J. Schoch* ..... 318
- Starch-Liquefying Activity of Alpha-Amylase. I. Use of Pregelatinized Wheat Starch as Substrate. *Y. Pomeranz and J. A. Sheltenberger* ..... 327
- Electrophoretic Composition of Glutens from Air-Classified Flours. *R. W. Jones and R. J. Dimler* ..... 336
- Note on the Distribution of Ash in an Australian Wheat. *J. J. C. Hinton* ..... 341
- The Centrifuge Method for Determining Flour Absorption in Hard Red Spring Wheats. *F. W. Sosulski* ..... 344
- Erratum ..... 350

## NUMBER 5, SEPTEMBER, 1962

- Rheological Studies of the Role of Lipids in Dough. *K. M. Narayanan and I. Hlynka* ..... 351
- Studies on the Cooking Quality of Rice. On the Plastogram of Rice. *Katsuharu Yasumatsu and Eiichiro Fujita* ..... 364
- Milling Losses Caused by Insect Infestation of Wheat. *E. A. R. Liscombe* ..... 372
- Corn Dry-Milling: Influence of Feed Rate and Tail-Gate Loading upon Beall Degerminator Performance. *O. L. Brekke, L. A. Weinecke, and E. L. Griffin, Jr.* ..... 381

Carotenoids of Corn and Sorghum. II. Carotenoid Loss in Yellow-Endosperm Sorghum Grain during Weathering. <i>C. W. Blessin, R. J. Dimler, and O. J. Webster</i> .....	389
Fatty Acid Composition of Oil from Damaged Corn and Wheat. <i>Doris Baker</i> .....	393
Use of Lactase in Breadmaking. <i>Y. Pomeranz, B. S. Miller, D. Miller, and J. A. Johnson</i> .....	398
A Note on the Wet-Milling of High-Amylose Corn Containing 75-Percent-Amylose Starch. <i>R. A. Anderson</i> .....	406
Editorial Policy and Suggestions to Authors .....	409

## NUMBER 6, NOVEMBER, 1962

The Effects of Iodate, N-Ethylmaleimide, and Oxygen on the Mixing Tolerance of Doughs. <i>P. Meredith and W. Bushuk</i> ...	411
Some Studies with Maleimide-Type Sulfhydryl-Blocking Agents. <i>C. C. Lee and L. M. Reynolds</i> .....	427
Flour as a Factor in Bread Firming. <i>J. G. Ponte, Jr., S. T. Titcomb, and R. H. Cotton</i> .....	437
Variations in the Amino Acid Composition of Australian Wheats and Flours. <i>D. H. Simmonds</i> .....	445
Glutamic Acid Decarboxylase Activity as a Measure of Damage in Artificially Dried and Stored Corn. <i>Gloria M. Bautista and Pekka Linko</i> .....	455
Note on a Rapid Method for the Estimation of Damaged Starch in Soft Wheat Flours. <i>J. R. Donelson and W. T. Yamazaki</i> ...	460
Quick Method for Riboflavin in a High-Potency Cereal Product. <i>R. H. Anderson and D. F. Moran</i> .....	463
The Origin and Fate of Certain Carbonyl Compounds in White Bread. <i>Yu-Yen Linko, John A. Johnson, and Byron S. Miller</i> ..	648
Oxidation of Wheat Starch with Chlorine. <i>Norito Uchino and Roy L. Whistler</i> .....	477
Communication to the Editor: Studies with Radioactive Tracers. VI. The Oxidation of Sulfhydryl Groups of Gluten by Bromate and Iodate. <i>C. C. Lee and E. R. Samuels</i> .....	482
Communication to the Editor: The Rate of Diffusion between Gas Cells in Batters or Doughs. <i>A. H. Bloksma</i> .....	485
Using a Density Gradient Column to Determine Wheat Density. <i>Wendell R. Peters and Robert Katz</i> .....	487
Editorial Policy .....	494
Index to Volume XXXIX .....	495
